### DETAILED ACTION

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The claimed “bringing said concentrated mesityl oxide stream in said separating device.” in claim 22, step iv) is not positively recited in the specification.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22-23 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gerlich et al (2002/0032350).

Gerlich is applied for the same reasons as set forth at page at the paragraph bridging pages 2 and 3 of the previous office action.

Claims 2-3, 5-8, 10-21 and 24-26 are allowed.

Applicants' arguments filed August 28, 2007 have been fully considered but they are not persuasive.

Applicants' argument that “..it is a mandatory requirement of the process taught by Gerlich et al. that the decomposition of mesityl oxide takes place in a separate apparatus..” is not considered well-taken. Gerlich at paragraph 0029 states

[0029] The reaction of mesityl oxide with water and the subsequent purification of the resulting acetone by distilla-

tion may be carried out in separate pieces of apparatus, e.g. in a reaction vessel and a separate distillation column or still, or in one single piece of apparatus, preferably in one single piece of apparatus, most preferably in a distillation column or still.

Thus, Gerlich recognizes carrying out simultaneously the reaction and distillation in a single or separate apparatus, alternately.

In the absence of anything which may be "new" or "unexpected result," a prima facie case of obviousness has been reasonably established by the art and has not been rebutted. Unexpected results must be established by factual evidence. Mere arguments or conclusory statements in the specification, applicants' amendments, or the Brief do not suffice. In re Linder, 457 F.2d 506, 508, 173 USPQ 356, 358 (CCPA 1872). In re Wood, 582, F.2d 638, 642, 199 USPQ 137, 140 (CCPA 1978).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
